

# **Local Development Plan**

**Technical Supplement 7:** 

Open Space, Sport & Outdoor Recreation
October 2019

# Contents

- 1.0 Introduction
- 1.1 Purpose and Background
- 2.0 Policy Context
- 2.1 Regional Policy Context
- 2.2 Local Policy Context
- 3.0 Key Findings Position Paper 12 Open Space, Sport and Outdoor Recreation
- 4.0 Executive Summary of Open Space Audit Technical Report
- 5.0 Open Space Audit Technical Report

#### 1.0 INTRODUCTION

## **Purpose and Background**

- 1.1 This Technical Supplement provides details of the evidence base used to inform the preparation of the Lisburn & Castlereagh City Council draft Plan Strategy for the period 2017 -2032. It is one of a suite of topic based Technical Supplements that should be read alongside the Local Development Plan (LDP) and which sets out the rationale and justification for the strategic policies, allocations and proposals within the draft Plan Strategy.
- 1.2 It builds upon the suite of 14 thematic Position Papers prepared and published alongside the Preferred Options Paper (POP), which established the baseline position and identified the key issues that need to be addressed by the LDP.
- 1.3 The evidence base has been informed through an independent audit of open space provision undertaken by professional consultants. This audit of open space provision has been undertaken as part of the Council's Open Space Strategy which will inform the Local Development Plan. In particular where the Open Space Strategy has identified spatial deficiencies in types of open space provision, it is expected that this will inform land use zonings, designations and key site requirements at the Local Policies Plan stage.
- 1.4 The key requirements of the study were to:-
  - Develop an overall Open Space Strategy working collaboratively in partnership with Council Officers to build capacity
  - Provide a detailed qualitative and quantitative review of all existing open space provision in the Council area (formal and informal open space provision)
  - Consider the type of open space facility in relation to accessibility
  - Explore further linkages between existing areas of open space and the proposed Strategic Greenways at Carryduff and West Lisburn
  - Advise on future recreational provision across the Council area up to 2032 (to align with the LDP time period)
  - Consider what open space provision (existing and potential) will need to be considered in all of the settlements within the Council area.
  - Consider the importance and role of the Strategic Greenways identified within the Council area, and how these can link in with and provide additional opportunities for open space
  - Provide a series of comprehensive recommendations as part of an Action Plan, to deliver the objectives of the Open Space Strategy

## 2.0 POLICY CONTEXT

#### **Regional Policy**

2.1 The regional policy context is provided by the Regional Development Strategy 2035 (RDS), the Strategic Planning Policy Statement (SPPS) and regional Planning Policy Statements. The latter are subject to the transitional arrangements set out in paragraphs 1.10-1.16 of the SPPS, which states that existing policy retained under the transitional arrangements will cease to have effect where a Council adopts its Plan Strategy. A summary of these documents and how they relate to plan making and open space and outdoor recreation is provided in the following sections.

## Regional Development Strategy (RDS) 2035

- 2.2 The RDS 2035 prepared under the Strategic Planning (Northern Ireland) Order 1999 by the Department for Regional Development (published 15th March 2012) is the spatial strategy for the Executive and provides an overarching strategic planning framework to facilitate and guide the public and private sectors and is material to decisions on individual planning applications.
- 2.3 The RDS promotes the link between environment, health and wellbeing and places emphasis on supporting healthy lifestyles and the promotion of health in the community. It recognises the importance of accessible green infrastructure and the benefits it can offer not only to people but to urban and rural renaissance and to improving the overall environment.
- 2.4 The guidance set out in RG 7 'Supporting urban and rural renaissance' promotes recreational space within cities, towns and neighbourhoods, and advises that new developments or plans should make provision for adequate green and blue infrastructure (green infrastructure includes parks and green spaces; blue infrastructure includes ponds, streams and lakes).
- 2.5 The RDS highlights the importance of community greenways and require these areas to be protected and enhanced as part of the network of open spaces in the Belfast Metropolitan Urban Area (BMUA) (SFG5: Protect and enhance the quality of the setting of the BMUA and its environmental assets). The green network provides opportunities to link walking and cycling routes to heritage and other areas of recreational interest. These recreation and amenity networks present an opportunity for people to get active, and promote the health and well-being of those living in urban areas.

# Strategic Planning Policy Statement for Northern Ireland (SPPS)

- 2.6 The SPPS set regional strategic objectives for open space, sport and outdoor recreation proposals which are to:-
  - Safeguard existing open space and sites identified for future such provision;

- ensure that areas of open space are provided as an integral part of new residential development and that appropriate arrangements are made for their management and maintenance in perpetuity;
- facilitate appropriate outdoor recreational activities in the countryside that do not negatively impact on the amenity of existing residents;
- ensure that new open space areas and sporting facilities are convenient and accessible for all sections of society, particularly children, the elderly and those with disabilities;
- achieve high standards of siting, design and landscaping for all new open space areas and sporting facilities; and
- ensure that the provision of new open space areas and sporting facilities is in keeping
  with the principles of environmental conservation and helps sustain and enhance
  biodiversity.

#### **LOCAL POLICY**

2.7 The current planning policy context at a local level is complex as a result of a successful legal challenge to the adoption of the Belfast Metropolitan Area Plan (BMAP) 2015. There are therefore five existing development plans that relate to parts of the Lisburn & Castlereagh Council district, alongside draft BMAP. All of these documents will be superseded at the adoption of the new Local Development Plan 2032.

## Belfast Metropolitan Area Plan 2015

- 2.8 Although formally adopted in 2014, this process of final BMAP adoption was declared unlawful as a result of a judgement in the court of appeal delivered on 18 May 2017. This means the Belfast Urban Area Plan (BUAP) 2001, Lisburn Area Plan 2001 and the other Development Plans provides the statutory plan context for the area.
- 2.9 BMAP, in its most recent, post-examination form remains a significant material consideration in future planning decisions. It was at the most advanced stage possible prior to formal adoption. BMAP referred to throughout this document therefore refers to that version. However, in preparing this document the council has also had regard to the provisions of the draft BMAP which was published in 2004, the objections which were raised as part of the plan process and the Planning Appeals Commission Inquiry report.

## Belfast Urban Area Plan (BUAP) 2001

2.10 The current development plan for the majority of the Belfast district is the Belfast Urban Area Plan (BUAP) 2001, which was adopted in December 1989. The area covered by the plan included the whole of the administrative area of the former Belfast City Council area, together with the urban parts of the former district council areas of Castlereagh, Lisburn and Newtownabbey as well as Greenisland and Holywood.

2.11 The purpose of the BUAP was to establish physical development policies for this broad urban area up to 2001, clarifying the extent and location of development and providing a framework for public and private agencies in their investment decisions relating to land use. Although alterations were made in 1996, the BUAP is now largely out-of-date and was formally superseded by the BMAP in September 2014. However, BMAP was quashed as a result of a judgement in the court of appeal delivered on 18 May 2017, meaning that the BUAP 2001 remains a statutory development plan.

#### The Lisburn Area Plan 2001

2.12 The change in council boundary as a result of the local government reform on 1 April 2015, and the subsequent quashing of BMAP, means that the Lisburn Area Plan 2001 remains a statutory development plan. Adopted on 4 July 2001, the Lisburn Area Plan sought to establish physical development policies for Lisburn and its surroundings up to 2001.

# **Lagan Valley Regional Park Local Plan 2005**

2.13 The quashing of BMAP also means that the Lagan Valley Regional Park Local Plan (adopted in 1993) was re-instated as the statutory development plan for the Lagan Valley Regional Park (LVRP). It sets out the strategy and policies associated with the protection and enhancement of the natural and man-made heritage of the LVRP. Its main objectives are to conserve the landscape quality and features of the Lagan Valley and to enhance recreational use for the public.

# **Carryduff Local Plan 1988-1993**

2.14 The adopted Plan comprises the provisions of the Draft Plan as approved and amended by the Adoption Statement. A composite Proposals Map and schedule for Carryduff was subsequently produced.

## **Lisburn & Castlereagh Community Plan**

- 2.15 The Council took on responsibility for community planning in 2015 as a result of local government reform. Community Planning is enshrined in the Local Government Act (Northern Ireland) 2014 and places a duty on the Council along with a number of named partners to identify long-term objectives for improving the social, economic and environmental well-being of the district and the achievement of sustainable development while promoting equality of opportunity and good relations and tackling poverty, social exclusion and patterns of deprivation. The plan sets out a joint vision and long-term ambitions for the future, as well as outlining priorities for action.
- 2.16 The Community Plan vision for Lisburn & Castlereagh is 'An empowered, prosperous, healthy, safe and inclusive community'.

2.17 Delivery of this vision is based on a number of strategic outcomes. Councils must take account of their current Community Plan when preparing a Local Development Plan (LDP). The Community Plan include the supporting outcomes including that neighbourhoods are designed and regenerated to promote well-being, everyone lives in an affordable home that meets their needs, we have access to essential services, shops, leisure and workplaces and there is a modal shift to sustainable and healthy transport options.

The LDP will provide a spatial expression to the community plan, thereby linking public and private sector investment through the land use planning system.

# 3.0 Key Findings – Position Paper 12 Open Space, Sport and Outdoor Recreation

- 3.1 A summary of the key findings of Position Paper 12 Open Space, Sport and Outdoor Recreation is provided below:-
  - Explore opportunities along Lisburn's Lagan Corridor for extending access and circulation to the towpath and the wider river and canal environs that have the potential to become an attraction for tourists and residents alike.
  - Explore the potential for improving links into the Belfast Hills.
  - Recognise the importance of good quality open space, sport and outdoor recreation provision on the health & well-being of residents and explore opportunities for further enhancing this provision.
  - Explore the potential for providing high performance sports facilities within Lisburn & Castlereagh City Council which are of strategic importance to sport in Northern Ireland.

# 4.0 Executive Summary of Open Space Audit Technical Report

#### Introduction

- 4.1 The Open Space Audit was carried out as part of an overall Open Space Strategy for Lisburn & Castlereagh City Council and will provide recommendations set out in an Action Plan to deliver the objectives of the Open Space Strategy.
- 4.2 The purpose of the audit is to assess and analyse open space provision across the Council area to establish the quality, quantity and accessibility of our open space assets.

# **Lisburn and Castlereagh Open Spaces**

4.3 Section 2.0 of the report acknowledges the Council's rich built and natural environment, including the landscapes and architecture of Hillsborough Castle and village and the rolling drumlin topography, woodlands and farmland of the Lagan Valley Regional Park

#### **Open Space Audit Methodology**

- 4.4 Section 3.0 of the report details the methodology used when carrying out the open space audit. This involved the site visits and review of 351 open space sites, with an area of 0.5 hectares and over.
- 4.5 Each open space audit site was mapped and surveyed with a number of representative photos taken. Information in relation to each site was recorded as follows:
  - **Site Information** site ID, location, size, open space type, written description
  - Site Condition condition of features and facilities, problems and issues recorded
  - Quality Assessment numerical score for each site, priority for action, recommendations
  - Recommendations Opportunities for potential improvements, recommendations for action

# **Open Space Standards**

- 4.6 Best Practice guidance suggests that standards should contain three elements:
  - Quantity an amount of space per house unit or head of population
  - Quality a benchmark against which quality can be measured
  - Accessibility an amount of particular types of open space within a specified distance i.e. a distance threshold

#### **Quantity of Open Space**

4.7 Quantity is a consideration in ensuring appropriate provision of open space and this was reviewed in light of the Fields in Trust standards.

#### **Quality of Open Space**

4.8 Quality is a key component of open space. Open spaces need to be 'fit for purpose' and serve local communities by providing a level of service and functional provision to meet informal leisure and recreational needs.

4.9 Each site as assessed on indicators based on the recommendations included in the 'Greenspace Quality: A Guide to Assessment, Planning and Strategic Development (2008)'.

There were 5 themes assessed and scored:

- Access & Community
- Attractiveness / Place Appeal
- Biodiversity
- Functionality
- Community Benefits

# **Accessibility of Open Space**

4.9 Access is a key component of open space. Open spaces need to serve local communities and deliver locally accessible open space providing a local resource that addresses daily needs, supports access by walking, cycling, horse riding and public transport, supports unsupervised use with safe accessibility and promotes informal recreation and exercise (dog walking, health walking or general passive use).

#### Types of Open Space in Lisburn & Castlereagh

- 4.10 Section 4.0 of the report details the different open space typologies to be assessed and the provision across the Council area. Eight open space typologies have been used, each having a variety of uses and secondary uses / characteristics:
  - Parks and Gardens
  - Sports Facilities
  - Amenity Green Space
  - Equipped Play Areas
  - Greenways
  - Natural & Semi-Natural Greenspace
  - Allotments & Community Gardens
  - Cemeteries
- 4.11 The largest category of open space in LCCC is Amenity Greenspace (162 sites), followed by Playing Pitches (63 sites).

#### **Quantity of Open Space**

4.12 Section 4.2 considers the quantity of open space provided within the Council area. There is a total of **831.27 hectares of open space** included in the Open Space Audit, limited to areas of 0.5 hectares and above. 57% of the total open space area is Parks and Gardens (475.99 ha) with 22% in use as sports areas (179.60 ha), 10% Natural & Semi-Natural Greenspace (85.14 ha) and 10% Amenity Greenspace (84.69 ha). Only 3.30 hectares (1%) of the open space is equipped play areas, though much of this space is located in larger parks and open spaces. Allotments and community gardens comprise 2.55 ha (less than 1%) of the open space.

#### **Quality of Open Space**

- 4.13 Section 4.3 gives a brief overview of the quality of open space provision throughout the Council area. When considering the quality data for each District Electoral Area (DEA), the DEA with the highest average quality score is Downshire West and the DEA with the lowest average quality score is Lisburn South.
- 4.14 An average quality score was calculated for each settlement, giving an indication of overall quality of open space within a settlement. The average quality score is 65%. Moira, Stoneyford, Moneyreagh, Ballyskeagh and Hillsborough have the highest average quality scores. Drumlough, Halftown, Upper Broomhedge, Luganville and Ravernet are the settlements with the lowest quality scores. The settlements with the lower scoring sites were considered in more detail to identify which sites could be improved with regards to quality of the open space.

## **Accessibility**

- 4.15 Section 4.4 considers the accessibility of the parks throughout the study area.
- 4.16 The southern and eastern parts of Lisburn City contain a wide variety of open space provision but residential areas towards the north west of the City have limited access to parks.
- 4.17 Moira and Hillsborough benefit from high quality open space facilities and flagship playgrounds whilst Carryduff has good overall park and play area provision, with all residential areas within easy distance from facilities.
- 4.18 The Newtownbreda area has an under provision of parks and gardens but a further review of open space provision should be undertaken. Dundonald is well served with regards to parks and play space and provision could be further extended through the upgrading of Ballybeen Green Space and Dungoyne Park to provide local park provision.
- 4.19 Many of the smaller settlements have access to open space and play areas with opportunities to upgrade existing facilities to provide local parks.

## **Open Space Priorities**

- 4.20 Section 5.0 considers opportunities for open space. The Audit identified a number of open spaces throughout the Council area and sets out the recommended actions for specific open spaces to meet the current deficiencies in open space facilities, quality and provision.
- 4.21 In addition, the following sites were identified for further review to potentially upgrade them to local parks, thereby improving the provision of recreation and play provision in the local area.

Lough Moss Leisure Centre	Carryduff
Hillmount Cottages Green Space	Moneyreagh

Windermere Lodge Green Space	Lisburn City
Rathvarna Drive Green Space	Lisburn City
Nettlehill Road Pitch	Lisburn City
Laurelhill Road Green Space	Lisburn City
Drumard Drive Green Space	Lisburn City

# 1.0 INTRODUCTION

# 1.1 The Open Space Strategy

The Open Space Strategy for Lisburn and Castlereagh has been prepared on behalf of Lisburn and Castlereagh City Council (LCCC). The overall aim of the study was to provide an Open Space Audit (incorporating pitches and equipped play areas) and prepare an Open Space Strategy for the Council area. The Open Space Audit will provide the appropriate evidence base for the Local Development Plan through an assessment of open space. The outputs will inform the Open Space Technical Supplement for the LDP and provide recommendations set out in an Action Plan to deliver the objectives of the Open Space Strategy. Understanding the role and function of Lisburn & Castlereagh's open spaces will enable the Strategy to make the most of these assets as well as providing better access and connections to them.

An Open Space Strategy is the formally approved policy document defining a Local Authority's approach, commitment and management to protect, enhance and manage open space assets.

Lisburn & Castlereagh City Council recognises that good quality and easily accessible open space can contribute to a better quality of life. The Council owns and maintains a large variety of open space, sport and outdoor recreational areas throughout the Council area. There are also privately-owned areas of open space including private playing fields in sports clubs and the education sector and grassland areas, glens, parks, walkways and amenity green space located within housing areas. The audit focusses on LCCC owned and managed open space but takes cognisance of privately owned open space.

This report sets out the methodology for the preparation of the LCCC Open Space Audit and provides an explanation of the outputs.

# 1.2 Open Space Audit

The purpose of an Open Space Audit is to assess and analyse open space provision across a Local Authority area to establish the quality, quantity and accessibility of open space assets. The Audit provides the baseline and analysis on which the Open Space Strategy is built.

Best practice UK guidance recommends that a strategy should comprise four elements:

- a strategic framework and vision for open space;
- an audit of existing open space provision;
- an assessment of current and future requirements; and
- a strategy statement with a clear set of priorities and actions.

The Open Space Audit will provide the Council's Open Space Managers with a viable "tool" to better define Open Space requirements and improve the management structures and practices and help ensure that the Council has a clear strategic direction to its open space investment and asset management.

# 1.3 The Benefits of Open Space

The range of benefits associated with open space are dependent upon the way the resource is planned, designed and managed to secure spaces that are 'fit for purpose' and address the needs of communities and stakeholders. Open spaces contribute to a range of national and local commitments

Ironside Farrar Ltd 1 50428 / October 2019

and policies, such as sustainable development, climate change adaptation, carbon management, outdoor learning, healthy living, sustainable transport, biodiversity and social equity policies.

The importance of open space is recognised at a Council wide level through its Plans and Strategies, including the LCCC Corporate Plan: Our Plan for Growth & Connecting 2018/2022 and Beyond. The Strategy will take cognisance of the following documents: Council Community Plan and LDP, Playing Pitch Strategy, Playability Audit and the Local Biodiversity Action Plan.

The Council envisages that an Open Space Strategy will:

- reinforce local identity and civic pride;
- enhance the physical character of an area;
- improve physical and social inclusion, including accessibility;
- protect and enhance biodiversity and ecological habitats;
- provide for children and young people's play and recreation;
- boost the economic potential of tourism, leisure and cultural activities;
- help mitigate and adapt to climate change; and
- contribute to the creation of healthy places.

The Open Spaces Strategy seeks to secure best value and provide a prioritised framework for investment, maintenance, management and Best Value. The Strategy will provide clear and concise guidance on best value utilisation of the Council resources in order to provide allocation and future spend decisions.

# 1.4 Study Area

The study area includes the City of Lisburn and the towns and villages in the wider Council area. The open space sites have been split into the District Electoral Areas of Killultagh, Downshire West, Downshire East, Lisburn South, Lisburn North, Castlereagh East and Castlereagh West.

© Crown copyright

# 1.5 Audit Outputs

The outputs of the study are specifically directed to achieve the main project goals, which are as follows: understand the supply / demand for open spaces, identify deficiencies, secure new provision and improve the quality through better accessibility and management.

The outputs of the study are as follows:

- **Technical Audit Report** summary of the audit methodology
- Mapped Assessment A3 report containing the analysis drawings of the data collected through the audit
- Excel Spreadsheets Results of the site audit summarised in tabular form (one sheet per settlement) (Electronic Data)
- **GIS Database** The results of the assessment will be recorded in a geo-database to enable the analysis of the collected data. All information collected during the audit has been entered in the database. However, the longer sections of text such as the site description are recorded in the Excel site proformas, to reduce the size of the database.
- **Photographs** 1 to 4 for each site included in the audit (Electronic Data)

Ironside Farrar Ltd 4 50428 / October 2019

# 2.0 LISBURN AND CASTLEREAGH OPEN SPACES

# 2.1 Lisburn & Castlereagh

Lisburn & Castlereagh stretches from the shores of Lough Neagh in the west to the hills above Dundonald in the east, and from the Belfast Hills in the north to the source of the River Lagan in the south. The heart of the area is the City of Lisburn, which has a rich history of Irish linen production during the 19<sup>th</sup> and 20<sup>th</sup> centuries and a number of historic parks and gardens.

**Castle Gardens** was once the site of Lisburn Castle in the 17<sup>th</sup> century and recently restored by LCCC with grant aid from the Heritage Lottery Fund in June 2008.

The 26 acre **Wallace Park** was gifted to the town by Sir Richard Wallace in 1884 and largely retains its original layout and Victorian character. The park was refurbished in 2012.

**Moira Demesne** is located in the picturesque village of Moira, comprising of over 40 acres of parkland with beautiful walkways, play and sports facilities.

**Hillsborough Forest** (200 acres) is set in the picturesque village of Hillsborough and adjacent to the Fort and has a network of waymarked routes.

**Moat Park** is situated in the heart of Dundonald and contains a historic Motte and an attractive green oasis, close to the historic Church of St Elizabeth.

**Hillsborough Castle** and **Village** provide a heritage destination hub, drawing visitors from across Northern Ireland and beyond.

Belfast is a growing tourism destination, and the attractions of Lisburn and Hillsborough contribute to the visitor numbers, with the destinations of Hillsborough Forest, Lisburn Castle Gardens, Wallace Park, Moat Park and the Lagan Valley Regional Park being tourist destinations in their own right. The council area has a rich built and natural environment, including the landscapes and architecture of Hillsborough Castle and village and the rolling drumlin topography, woodlands and farmland of the Lagan Valley Regional Park. The area is characterised the strong urban core of Lisburn and a diverse and rich rural hinterland of scenic landscape and villages rich in heritage.

Ironside Farrar Ltd 6 50428 / October 2019

# 3.0 OPEN SPACE AUDIT METHODOLOGY

## 3.1 Site Selection

Key elements in our approach and methodology are building on the knowledge and lessons learnt from UK Open Space Audit & Strategy Best Practice, creating usable outputs and the development of a tool for future open space management.

The Open Space Audit involved the site visits and review of 351 No. open space sites of over 0.5 hectares in size. The sites were selected by LCCC and form the Open Space Database.

The following towns and villages were included in the Open Space Audit:

- Aghalee (6 sites)
- Annahilt (4 sites)
- Ballyskeagh (2 sites)
- Carryduff (17 sites)
- Castlereagh Countryside (2 sites)
- Castlereagh Greater Urban Area (28 sites)
- Crossnacreevy (3 sites)
- Dromara (4 sites)
- Drumbo (3 sites)
- Drumlough (2 sites)
- Dundonald (29 sites)
- Dundrod (1 site)
- Glenavy (9 sites)
- Halftown (4 sites)
- Hillsborough & Culcavy (19 sites)

- Lisburn City (134 sites)
- Lisburn Countryside (2 sites)
- Lisburn Greater Urban Area (27 sites)
- Long Kesh (1 site)
- Lower Ballinderry (4 sites)
- Lurganure (2 sites)
- Lurganville (2 sites)
- Maghaberry (10 sites)
- Milltown (5 sites)
- Moira (10 sites)
- Moneyreagh (7 sites)
- Ravernet (4 sites)
- Ryan Park (3 sites)
- Stoneyford (3 sites)
- Upper Broomhedge (1 site)

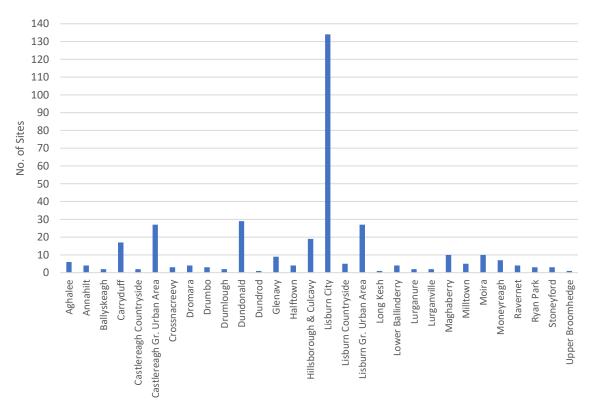

Chart 1: Number of Sites Included in the Audit

Ironside Farrar Ltd 7 50428 / October 2019

The mapping and open space standards stages of the project included the consideration of the wider open space network, to ensure that an accurate picture of the open space resource is established.

## 3.2 Site Assessment Process

The audit open space sites were mapped and site survey proformas developed to use in the field. Teams of landscape architects undertook the audit, overseen by the Audit Manager. All relevant GIS data (ESRI ArcGIS) was loaded onto Tablet PCs that allowed the site audit team to record site information directly into qualitative assessment forms on the computer. Recorded data was downloaded at the end of each day.

A number of representative photographs were taken of each site. A proforma was completed for the site visits, held on an excel spreadsheet with a row for each site, using the agreed categories and assessment criteria. This method enables information to be easily transferred into the GIS database.

The following information was recorded:

#### • Site information

- Site ID
- Site Name
- Settlement / location of the site
- Size of the site, taken from the GIS polygon information (hectares)
- Type of open space, according to the agreed typology and sub-categories, (tested on site)
- Hierarchy
- Ownership (based on LCCC information)
- Written description of the site, for example:
  - Physical site features e.g. grassed areas, tree planting, planting, signage, paths, entrances, boundaries (hedges / gates / fences) etc.
  - OPlanting (woodland / trees / shrubs / flower beds) / Bins / seating / lighting etc.
  - O Site facilities e.g. play area, benches, car park, sports area, pitches etc.
  - Context / setting / facilities, built / natural features

# Site Condition

- Brief written assessment of the following elements:
  - Condition of site features and facilities
  - o Problems & issues observed at the time of audit

# • Quality Assessment

- Quality Assessment numerical score for each site (according to Greenspace Scotland quality assessment)
- Priority for action (high / medium / low)
- Recommendations for each site

## Recommendations

- Recommend opportunities for potential improvements to the open space (e.g. new facilities, improved path linkages, upgraded planting, future use, maintenance regimes, signage, interpretation etc.)
- Audit reports for the Open Space sites and recommendations for action on each site.

Note: Information for the following types of open space was provided by others to inform the audit:

- Provision for Children and Young People (provided by Playability Audit)
- Formal sport pitches and other formal facilities (provided by Playing Pitch Strategy)

Ironside Farrar Ltd 8 50428 / October 2019

# 3.3 Open Space Standards

LCCC established open space standards as the next step in integrating the Open Space Audit and Strategy into the Local Development Plan. Setting standards allows a better understanding of the current status of open space assets across a local authority area. Open space standards will inform the Local Development Plan process.

Best practice guidance suggests that standards should contain three elements:

- Quantity an amount of space per house unit or head of population
- Quality a benchmark against which quality can be measured
- Accessibility an amount of particular types of open space within a specified distance, i.e. a
  distance threshold

## **Quantity of Open Space**

Quantity is a consideration in ensuring appropriate provision of open space, albeit that it has perhaps been over-emphasised historically relative to the importance of good accessibility and quality. The Fields in Trust (formerly National Playing Fields Association) recommends a minimum standard for 'outdoor playing space' of 2.4 hectares per 1,000 population<sup>1</sup>. This is commonly referred to as the '6 Acre Standard'. Outdoor playing space' is made up of two main components. The first of these is land provided for outdoor sport, principally for adults and youths. The second is playing space for children.

The quantity of open space provision has been reviewed in light of the Fields in Trust standards by LCCC and may be reviewed as part of the local area assessment.

# **Quality of Open Space**

Quality is a key component of open space. Open spaces need to be "fit for purpose" and serve local communities by providing a level of service and functional provision to meet informal leisure and recreational needs.

The quality assessment part of the audit process is probably the most complex area to secure consistent evaluation. Setting quality criteria to assess the standard of an open space is made more difficult by the diversity of spaces (character, scale, function) and the difficulties involved in establishing a common set of criteria against which to evaluate quality. This problem can be addressed by recognising that quality criteria are not absolute measures but rather provide an informed, common sense approach on which a consistent judgement of the quality of a space can be determined.

The indicators are based on the recommendations included in the "Greenspace Quality: A Guide to Assessment, Planning and Strategic Development" (2008). Appendix 1 sets out the scoring criteria for each of the indicators.

There are 5 themes and 7 or 8 indicators under each theme:

- Access & Community
- Attractiveness / Place Appeal
- Biodiversity
- Functionality
- Community Benefits

Ironside Farrar Ltd 9 50428 / October 2019

<sup>&</sup>lt;sup>1</sup> Planning Policy Statement 8: Open Space, Sport and Outdoor Recreation

The following table sets out the scoring criteria for each of the indicators, based on the Greenspace Scotland Guidance<sup>2</sup>:

Access & Community	Attractiveness / Place Appeal	Biodiversity	Functionality	Community Benefits
Well located & close to community	Attractive and offers a positive image	Contribute +ve biodiversity/water/air quality	Offers a range functions / flexibility of use	Safe and welcoming
Meets DDA requirements/ Disabled Needs	Provides an attractive setting	Large enough to sustain wildlife populations	Diverse play / sport/ recreational opportunity	Good levels of natural surveillance
Provides Quality Paths Fit-for-Purpose	Quality materials/equipment/f urniture	Offer diversity of habitats	Offers good places for Social Interaction	Low levels/Absence of anti-social behaviour
Connects to other transport nodes	Attractive planting/landscape elements	Part of wider landscape structure	High quality facilities meeting user needs	Appropriate lighting levels
Allows movement in & between places	Welcoming boundaries/entrances	Connects to wider green Networks	Appropriate facilities for location/ size/use	Sense of local identity & place
Has accessible entrances in right places	Facilities in clean/safe/usable condition	Balance habitat protection & access	Facilities well sited for all ages	Provide routes to wider community facilities
Offers connected path network and signage	Low levels of litter & adequate bins	Resource efficient (grass cutting/peat compost/)	Adaptable to changing needs / use	Contains distinctive/memorable places
	Well maintained			Community involvement in management

Table 1: Open Space Quality Assessment Criteria

Each site is given a score between 1 and 5 (low to high) for each of the assessment indicators, which are then sub totalled for each theme. All of the criteria are relevant for the larger multifunctional sites. However, there are some types of sites (e.g. amenity greenspace) where some criteria (e.g. balance habitat protection & access) are not considered relevant due to the size and type of the site. A "not applicable" symbol is entered into the database against the non-relevant criteria. Then each of the site scores are totalled and a percentage score generated based on the number of criteria assessed. In this way, a particular site is not marked down because it does not possess a feature that is not relevant to the quality of the space.

However, as with any database, there are limitations regarding the use and function of the dataset. The audit includes open spaces of all types and sizes, with a diverse range of functions and greenspace elements. Therefore, the study recommends that the total value score should not be viewed in isolation of the other parts of the assessment, but rather seen as an indicator to highlight issues and patterns.

Not all open space sites were assessed for quality, due to the range of types of sites included in the audit. The assessment was not able to be undertaken for indoor sports facilities, private sports pitches and other facilities, school grounds and cemeteries.

Ironside Farrar Ltd 10 50428 / October 2019

 $<sup>^{2}</sup>$  Greenspace Quality: A Guide to Assessment, Planning and Strategic Development, Greenspace Scotland

The scores for each indicator are totalled and an overall percentage score given. The total percentage scores have been separated into three bands. This banding provides a useful starting point to review the quality of the overall open space resource. Any sites in band E are not considered to be fit for purpose.

Quality Scoring			
Band A	Score of 80% or more	Excellent	
Band B	Score of 70% - 79%	Very Good	
Band C	Score of 60% - 69%	Good	
Band D	Score of 50% - 59%	Fair	
Band E	Score of less than 50%	Poor	

Table 2: Open Space Quality Scoring

The LCCC open space quality standard requires:

- All parks and play areas should be brought up to the 65% quality standard through a rolling programme of quality upgrades, as resources and project coordination allow
- All amenity open space, in the audit, should be brought up to the 50% quality standard through a rolling programme of upgrades
- Provision of high quality play space and associated facilities, providing safe play opportunities for children and young people of all ages. Ensure that all play areas operated and maintained by the Council are in good condition, safe and litter free
- All new open space to address the 5 quality criteria set out in the Greenspace Scotland Quality Criteria and achieve band A or B scores across all typologies, which will be assessed at design and post implementation stages

## Accessibility of Open Space

Access is a key component of open space. Open spaces need to serve local communities and deliver locally accessible open space providing a local resource that addresses daily needs, supports access by walking, cycling, horse riding and public transport, supports unsupervised use with safe accessibility and promotes informal recreation and exercise (dog walking, health walking or general passive use).

International research into the impacts of greenspace on health and on wider quality of life shows that having greenspace within a 5 minute walk of home is a strong indicator for health and quality of life benefits. 0.5 hectares is big enough for a 'kick about' pitch or other informal play. Generally, in urban design, a 5 minute walk is considered to equate to a distance of 400 metres 'door to space'.

The accessibility standard refers to how close people should be to their nearest publicly usable open space. It requires assessment using straight line distance thresholds for particular types of open space. Distance thresholds are a useful planning tool, especially when used in association with GIS. It is possible to measure the number of households within a distance threshold comparison of sites, neighbourhoods and community settlements. Distance thresholds set the maximum distance that typical users can reasonably be expected to travel to each type of provision.

Ironside Farrar Ltd 11 50428 / October 2019

LCCC sets an accessibility standard for open space that requires all residential areas have easy access to the following:

Open Space Type	Accessibility Standard	Application
City Park / Historic Park	1.6km walking catchment (approx. 20min walk)	City
Town Park	1200m walking catchment (approx. 15min walk)	Town
Local Park	400m walking catchment (approx. 5min walk)	City / Town / Village
Flagship Play Area	1.6km walking catchment (approx. 20min walk)	City
Neighbourhood Equipped Areas for Play (NEAP)	1,000m walking catchment (approx. 13min walk)	City / Town / Village
Local Equipped Areas for Play (LEAP)	400m walking catchment (approx. 5min walk)	City / Town / Village

Table 3: Open Space Accessibility Standards

# 3.4 Data Management

An important element in planning for the Audit is understanding the need for information and securing all necessary agreements on how data will be managed, co-ordinated and accessed, together with appropriate protocols for GIS mapping and data capture. Care should be taken in ensuring that change records are established for the database to ensure that any changes are properly logged and reported.

It is important to note that the Audit is a dynamic piece of work and the sites included in the study should be considered to be stage 1 of an ongoing process. The information recorded in the GIS and Excel database should be reviewed on an annual basis and added to as environmental work is undertaken to ensure that the information remains current.

# 3.5 Open Space Mapping

The information gathered through the Audit has been illustrated on a series of maps, including the following:

- Open Space Types
- Open Space Quality
- Parks Hierarchy
- Play Areas

The maps illustrate the audit findings, the standards review and will inform the Open Space Strategy.

# 4.0 OPEN SPACE RESOURCE

# 4.1 Type of Open Space in Lisburn & Castlereagh

PPS 8: Open Space, Sport and Outdoor Recreation defines open spaces as "all open space of public value, including not just land, but also inland bodies of water such as rivers, canals, lakes and reservoirs which offer important opportunity for sports and outdoor recreation and can act as visual amenity". This strategy focuses on the open spaces that are on the land.

Eight open space typologies have been used, each having a variety of uses and secondary uses / characteristics. Each open space audit site has been assigned an identification reference, a name, location, typology and type, as set out in the table below. A GIS shape file has been prepared for the open spaces included in the audit, to which the site survey data has been attached.

The following chart illustrates that the largest category of open space is Amenity Greenspace (162 sites), followed by Playing Pitches (63 sites). The type of open spaces is further expanded in Table 4.

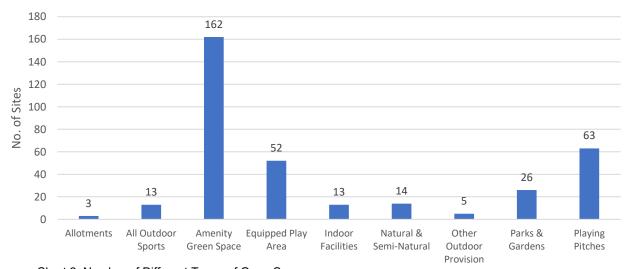

Chart 2: Number of Different Types of Open Space

Ironside Farrar Ltd 13 50428 / October 2019

Open Space Type	Sub-type	Description
Parks & Gardens	Regional Park	Lagan Valley Regional Park is Northern Ireland's first and only Regional Park. The Lagan Valley Regional Park was established in 1967 as one of three unique semi-urban designations in the UK at that time. The Park is located between Stranmillis, Belfast and Union locks, Lisburn and covers some 4,200 acres of countryside and eleven miles of riverbank. Major leisure facility, with a wide catchment of users, often travelling long distances by car and or public transport for a 'family day out'.
	City Park / Historic Park 1.6km walking catchment (approx. 20min walk)	Parks such as Moira Demesne which are large areas of parkland of significant size, offering a combination of facilities and heritage features at the sub-regional level. The parks draw visitors to the town / city, are accessible by public transport and contain superior quality of facilities.
	Town Park 1200m walking catchment (approx. 15min walk)	Large to medium sized areas of open space that provide a variety of activities and natural features, including sports facilities, children's play for all ages, informal recreation, gardens and seating areas.
	Local Park 400m walking catchment (approx. 5min walk)	These parks are small areas of open space, and may contain children's play, seating, courts or pitches and nature conservation areas. They are often well used parks within walking distance of the immediate residential area.
Outdoor Sports Facilities	All Outdoor Sports Indoor Facilities Other Outdoor Provision Playing Pitches	Sports facilities with natural or artificial surfaces and either publicly or privately owned. Including tennis courts, bowling greens, sport pitches, golf courses, athletic tracks, school and other institutional playing fields, and other outdoor sports areas, which are generally bookable.
Amenity Green Space		Landscaped areas providing visual amenity or separating different buildings or land uses including informal recreation spaces, communal green spaces in and around housing, and village greens, most commonly found in housing areas.
Equipped / Designated Play Area	Flagship Play Areas 1.6km walking catchment (approx. 20min walk)	Flagship play park, combining traditional play concepts with state of the art equipment for an easily accessible yet entertainingly challenging play experience. Containing, often themed equipment suitable for 2 to 10 years.
	Neighbourhood Equipped Areas for Play (NEAP) 1,000m walking catchment (approx. 13min walk)	Neighbourhood Equipped Area for Play are areas of open space specifically designated, laid out and equipped mainly for older children (aged 12+ years), but also with play opportunities for younger children. May include kickabout areas, Multi Use Games Area, skateboard parks and outdoor basketball hoops).
	Local Equipped Areas for Play (LEAP) 400m walking catchment (approx. 5min walk)	Local Equipped Area for Play, aimed at children who are beginning to go out to play independently (aged 5 – 12 years), close to where they live. May include opportunity for informal recreation.
Greenways	,	Designated segregated walking and cycling routes identified in the RDS 2035. They are primarily active travel corridors, but will play an increasingly important role, allowing people to move safely between open spaces, to destinations in the city and out to the countryside.
Natural & Semi Natural Greenspace		Areas of undeveloped or previously developed land with residual natural habitats or which have been planted or colonised by vegetation and wildlife, including woodlands, urban forestry, grasslands (e.g. meadows), wetlands, open and running water.
Allotments and Community Gardens		Allotments and areas of land for growing fruit and vegetables, either in individual allotments or as a community activity.
Cemeteries		Includes cemeteries and churchyards.

Table 4: Open Space Typology

Ironside Farrar Ltd 14 50428 / October 2019

# 4.2 Quantity of Open Space

## Quantity of Open Space Included in the Open Space Audit

Previous assessments of open space have included quantity assessment through the application of the Fields in Trust standards. The quantity of open space provision has been reviewed by LCCC and will be reviewed as part of the local area assessment.

There is a **total of 831.27 hectares of open space** included in the Open Space Audit in the Lisburn & Castlereagh council area. This area is limited to the areas of open space of 0.5 hectares in size, which are publicly accessible and included in the Open Space Audit. Considering the total open space provision can provide a useful guideline on provision within individual settlement areas and is important in establishing a broad equity across settlements and local neighbourhoods.

Open space is distributed throughout the DEAs as follows:

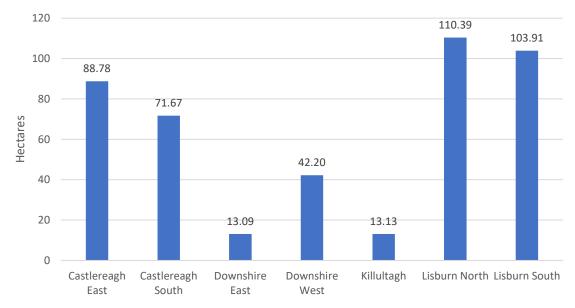

Chart 3: Distribution of Open Space by DEA

Settlements included in the audit vary considerably in their size, number of sites and quantity of open space. Table 5 and Chart 4 illustrates the quantity of open space per settlement. The settlement with the largest area of open space is Lisburn, where much of the population of LCCC lives. There is a total of 175.35 hectares of open space in Lisburn City.

Carryduff, Castlereagh Greater Urban Area, Dundonald, Lisburn Urban Area, Hillsborough and Moira also have significant quantities of open space. Hillsborough Forest Park provides an extensive area of open space in the Lisburn Countryside.

Ironside Farrar Ltd 15 50428 / October 2019

Settlement	Area (ha)	Settlement	Area (ha)
Aghalee	1.88	Lisburn City	175.35
Annahilt	0.81	Lisburn Countryside	396.77
Ballyskeagh	8.90	Lisburn Gr. Urban Area	29.59
Carryduff	38.56	Long Kesh	1.07
Castlereagh Countryside	5.13	Lower Ballinderry	0.47
Castlereagh Gr. Urban Area	33.97	Lurganure	0.34
Crossnacreevy	0.22	Lurganville	0.28
Dromara	1.93	Maghaberry	3.59
Drumbo	1.39	Milltown	1.06
Drumlough	1.06	Moira	17.77
Dundonald	79.88	Moneyreagh	2.38
Dundrod	0.59	Ravernet	1.21
Glenavy	5.52	Ryan Park	0.30
Halftown	0.63	Stoneyford	0.30
Hillsborough & Culcavy	19.56	Upper Broomhedge	0.76

Table 5: Quantity of Open Space by Settlement

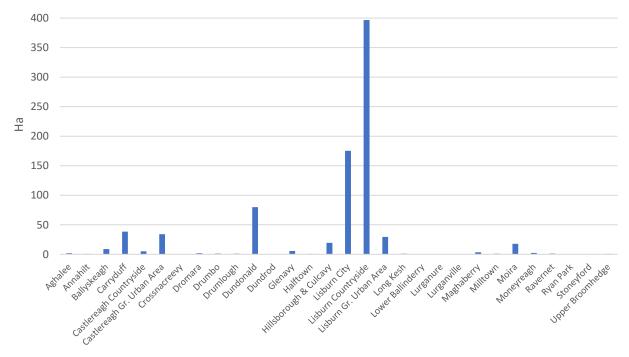

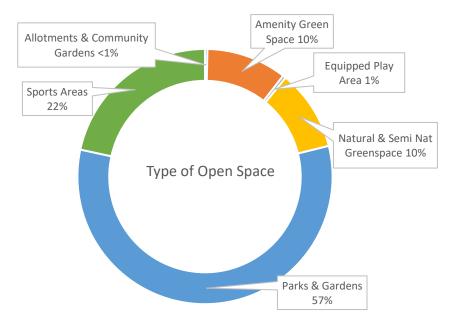

Chart 4: Quantity of Open Space by Settlement

With regard to the area of the different types of open space, 57% of the total open space area is Parks & Gardens (475.99ha), with 22% in use as sports areas (179.60ha), 10% Natural & Semi-natural Greenspace (85.14ha) and 10% amenity greenspace (84.69ha). Only 3.30 hectares (1%) of the open space is equipped play areas, though much of this space is located in larger parks and open Allotments and spaces. community gardens comprise 2.55ha (less than 1%) of the open space.

Chart 5: Amount of the Types of Open Space

Parks and Gardens are the largest category of open space (478.98 hectares), with sports areas being the second largest category of open space (179.60 hectares).

Open Space Type	Sub-type	Number of sites	Area (ha)
Parks & Gardens	Regional Park	1*	-
	City Park / Historic Park	3	16.11
	Town Park	11	441.83
	Local Park	12	18.05
Total Parks		26	475.99
Outdoor Sports Facilities	All Outdoor Sports	13	21.24
	Indoor Facilities	13	5.23
	Other Outdoor Provision	5	2.32
	Playing Pitches	63	150.81
Total Outdoor Sports			179.60
Amenity Green Space	Amenity Green Space	162	84.69
Equipped / Designated Play Area	Flagship Play Areas	5	0.80
	Neighbourhood Equipped Areas for Play (NEAP)	8	0.49
	Local Equipped Areas for Play (LEAP)	39	2.01
Total Play Areas		52	3.30
Natural & Semi Natural Greenspace	Natural & Semi Natural Greenspace	14	85.14
Allotments & Community Gardens	Allotments & Community Gardens	3	2.55
Total Open Space		351	831.27 ha

<sup>\*</sup> Total parks calculation does not include the Lagan Valley Regional Park Table 6: Quantity of Open Space per Open Space Type

Ironside Farrar Ltd 17 50428 / October 2019

## **Lisburn City**

There is a total of 175.35 hectares of open space in Lisburn City, which appears to be well dispersed throughout the residential areas. (Refer to Figure 1 Open Space Types.) The urban open space is further enhanced by access to the countryside and the Belfast Hills to the north and the Lagan Valley Regional Park to the south, which connects the city to Castlereagh and Belfast.

The City of Lisburn is well served in terms of City Parks / Historic Parks, which provide a range of high quality recreational, sporting and play opportunities, set within a historic park setting. These City Parks include Wallace Park, Duncan's Park and Castle Gardens and provide local park facilities, along with facilities for the people of the city and tourists. Figure 3 illustrates the accessibility of these parks, in context of the other park provision in the city.

There are also two Town Parks in the City, including Barbour Memorial Playing Fields and Magheralave Road Green Space. There are 5 Local Parks, including Lambeg Park, Tom Robinson Park, Grand Street, Maralin Avenue / Drumbeg Drive and Sir Milne Barbour Memorial Park. Many of these parks contain equipped children's play areas, providing formal and informal play space for children and young people. Wallace Park and the Queen Elizabeth II Playing Fields contain Flagship play areas, which combine traditional play concepts with state of the art equipment for an easily accessible yet entertainingly challenging play experience. The park provision is supplemented by a range of sports areas, natural / semi-natural greenspace and amenity greenspace. Provision is well distributed throughout the city, with an overall high quality of provision.

The residential areas to the **north of Lisburn city**, including Ballymacash, Tonagh and Magheralave, are characterised mainly by low-density detached and semi-detached housing. There are significant areas of land zoned for housing to the north and north west of the City, which include open space provision and play provision. Current levels of open space vary according to the age of the housing estate, with some of the older estates containing high levels of amenity open space, but without high levels of park space. Levels of provision in the more recently built residential developments varies, with some providing high quality attractive spaces, and other estates providing very little public open space. There is a deficiency of parks space in these residential areas, which could be addressed by the provision of additional facilities in the following open spaces: Windermere Lodge Green Space, Rathvarna Drive Green Space and Laurelhill Road Green Space.

Ironside Farrar Ltd 18 50428 / October 2019

The **eastern parts of Lisburn City**, including Wallace Park and Harmony Hill, contain a wide variety of open space provision, ranging from historic City Parks, sports fields and large areas of amenity greenspace along the River Lagan. The Glenmore residential area contains large areas of amenity greenspace and easy access to the River Lagan walkway and Glenmore Activity Centre.

The **southern parts of the City** are well provided for with regards to open space provision. The Old Warren residential area contains a range of parks, sports pitches, amenity open space and children's play areas. This area is characterised by high density housing with large areas of amenity open space and is located adjacent to the River Lagan walkway. The Lagan Valley Leisureplex provides playing fields and sports facilities for the area. Additional facilities could be provided in the following open space to address deficiencies in provision: Drumard Drive Green Space.

#### Lisburn Greater Urban Area

The Derriaghy, Kilmakee and Dunmurry areas of the Lisburn Metropolitan area have a good spread of open space throughout the area. To the north, outwith the Council area, Colin Glen Linear Park forms a landscape wedge between Belfast and Lisburn Cities, providing opportunity for recreation. Derriaghy contains a local park (Bell's Lane Park) and there is potential to upgrade the River Road/ Ballybog Road Green Space to provide local park provision.

## Castlereagh Greater Urban Area

Castlereagh Greater Urban Area includes the settlements of Dundonald and Newtownbreda. Newtownbreda has an under provision of park space, with Colby Park being the only local park and there is limited play space in the surrounding residential areas. Park space and play provision should be identified in the southern part of the residential area, which contains very little open space.

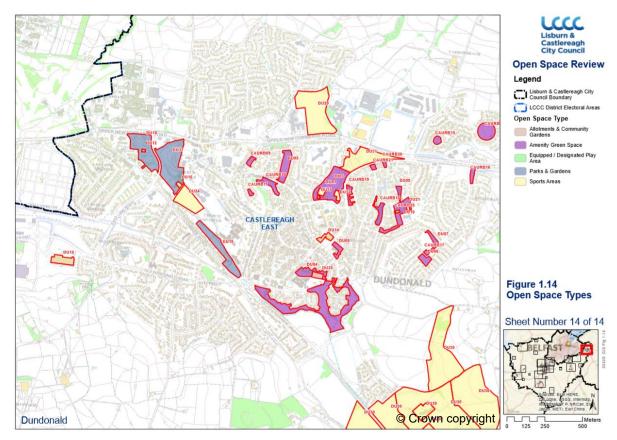

**Dundonald** is well served with regards to parks and play space, with Moat Park and a Flagship play area (Moat Park Play Area). Town parks are provided in Dundonald (Moat Park). However, provision could be extended through the upgrading of Ballybeen Green Space and Dungoyne Park to provide local park provision.

## **Towns & Villages**

The two main towns within the Lisburn rural area, Moira and Hillsborough have good levels of very high-quality open space, providing a range of facilities for sport, recreation and play. There is a Town Park (Hillsborough Fort) and a Local Park (Hillsborough Park) in Hillsborough. There is a large Town Park in Moira called the Moira Demesne. Moira Demesne also contains a Flagship play area. Both the Hillsborough and Moira parks provide exceptional park facilities for the town and visitors to the area.

The smaller towns and villages throughout the rural area all contain parks or areas of open space. Town parks are provided in Carryduff and Dromara (Lagan Park). Local parks are provided in Ballyskeagh (Mcilroy Park), Maghaberry (Maghaberry Village Green and Maghabery Road Community Centre), Moneyreagh (Moneyreagh Community Centre) and Stoneyford (Stoneyford Road Green Space).

Ironside Farrar Ltd 19 50428 / October 2019

The map below illustrates the provision of the various types of open space in Dundonald.

Extract from Figure 1 mapping: Dundonald

Chapter 5 lists the open space priorities for each settlement, including recommendations for open space upgrades and additional facilities, which will address any deficiencies identified through the Open Space Audit process. The more centrally located residential areas are characterised by detached housing with large gardens. Public park provision in this area is good, with a range of open spaces close-by, containing a range of facilities.

Ironside Farrar Ltd 20 50428 / October 2019

## 4.3 Quality of Open Space

The following section sets out the summary analysis of the quality of the open spaces in the LCCC settlements. When considering the quality data for each DEA, the DEA with the highest average quality score is Downshire West and the DEA with the lowest average quality score is Lisburn South.

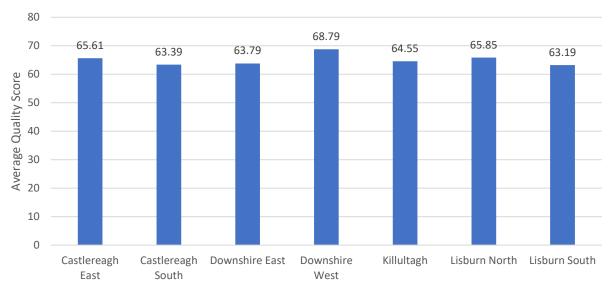

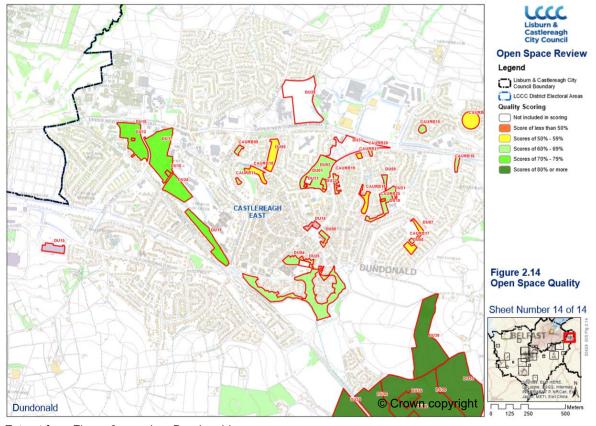

Chart 6: Average Quality Score per DEA

Figure 2 illustrates the Open Space Quality scores for the sites that were included in the audit. The map below illustrates the quality scores of the open spaces assessed in Dundonald.

Extract from Figure 2 mapping: Dundonald

Ironside Farrar Ltd 21 50428 / October 2019

The chart below includes the scores for all the open spaces included in the audit. Each bar represents a site quality score, which have been ordered from the lowest to the highest score. The scores range from 44% (Willow Gardens, Lisburn North) to the highest score of 91% (both Moira Demesne and Wallace Park), with the majority of sites scoring in the 50s, 60s and 70s.

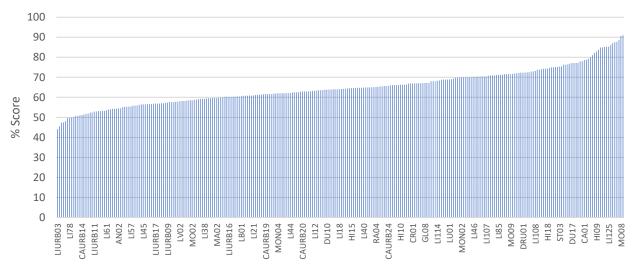

Chart 7: Range of Quality Scores

Lisburn City and Lisburn Greater Urban Area contains 9 out of 20 of the worst scoring open space sites. However, Lisburn City also includes 12 out of the 20 top scoring open spaces. Moira, Hillsborough and Dundonald contain high scoring sites.

Calculating an average quality score for each settlement can give an indication of overall quality of open space in a settlement. The average quality score is 65%. The chart below indicates that Moira, Stoneyford, Moneyreagh, Ballyskeagh and Hillsborough have the highest average quality scores. Drumlough, Halftown, Upper Broomhedge, Lurganville and Ravernet are the settlements with the lowest average quality scores. The settlements with the lower scoring sites have been considered in more detail to identify which sites could be improved with regards to quality of the open space.

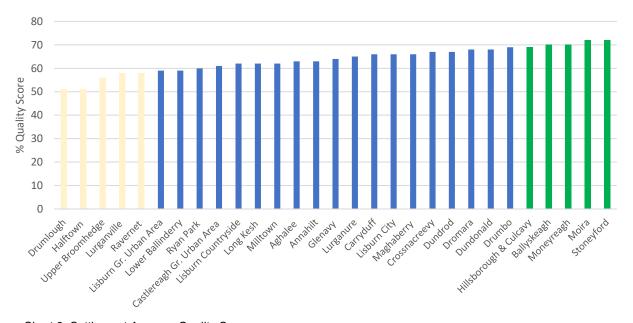

Chart 8: Settlement Average Quality Score

Ironside Farrar Ltd 22 50428 / October 2019

The top 20 quality sites and the bottom 20 quality sites are listed below:

Reference	Site Name	Settlement	Quality Score
MO08	Moira Demesne	Moira	91
LI101	Wallace Park	Lisburn City	91
LI48	Berkeley Hall Green 2	Lisburn City	89
LI103	Castle Gardens	Lisburn City	88
LI50	Ballantine Gardens 2	Lisburn City	88
DU22	Billy Neill Pitches	Dundonald	87
LI105	The Tom Robinson Park	Lisburn City	86
LI102	Duncan's Park	Lisburn City	85
LI51	Ballantine Gardens 3	Lisburn City	85
HI05	Dunbeg Park Green Space	Hillsborough	85
LI124	Wallace Park Pitches	Lisburn City	85
LI125	Wallace Park Grass Pitch	Lisburn City	85
LI49	Ballantine Gardens 1	Lisburn City	84
HI09	Hillsborough Play Area	Hillsborough	83
MO06	Moira Demesne Play Area	Moira	82
LI73	Wallace Park Play Area	Lisburn City	81
MA07	Maghaberry Village Green	Maghaberry	80
CA01	Let's Go Hydro Water Park	Carryduff	79
DU19	Moat Park 3	Dundonald	79
LI74	Ballymacoss Play Area	Lisburn City	79

Table 7: Top 20 quality scores

Reference	Site Name	Settlement	Quality Score
LIURB11	Lilac Walk Green Space	Lisburn Greater Urban Area	53
RA01	Ravarnet Gardens Green Space	Ravernet	53
DU06	Coopers Mill Park Green Space	Dundonald	52
CAURB23	Cairnshill Park and Carnbrae Avenue	Castlereagh Greater Urban Area	52
LI129	Nettlehill Road Pitch	Lisburn City	52
DU05	Davarr Avenue Green Space	Dundonald	52

LI63	Mourneview Park 2 Green Space	Lisburn City	48
LI98	Magheralave Road Green Space	Lisburn City	47
RY01	Ryan Park Green Space 1	Ryan Park	47
ML01	Milltown Road/Gardens Green Space	Milltown	46
LIURB03	Willow Gardens	Lisburn Greater Urban Area	44

Table 8: Bottom 20 quality scores

The chart below summarises the number of sites in each of the quality bands. Approximately half of the sites scored between 65% and 91% (136 out of 278 sites). There are 30 sites that score between 50 and 54, and only 5 sites that scored between 44-49. This graph demonstrates that the majority of LCCC open spaces included in the open space audit scored 50% and above, with only 5 not considered fit for purpose. There is opportunity to improve the quality of these sites, and to improve the quality of some of the lower quality parks and amenity greenspaces.

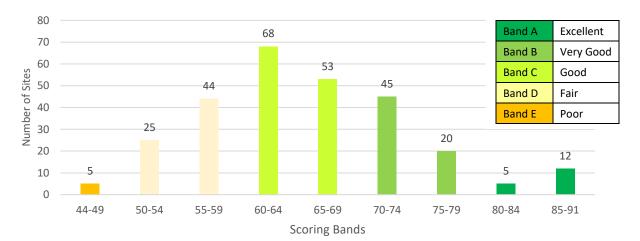

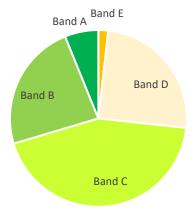

Chart 9: Quality Scores in the Bands

The following parks and play areas do not meet the 65% quality standard and should be improved:

Reference	Site Name	Settlement	Туре	Quality Score
LI98	Magheralave Road	Lisburn City	Parks & Gardens	47
CAURB26	Colby Park	Castlereagh Gr. Urb. Area	Parks & Gardens	55

LIURB03	Willow Gardens	Lisburn Gr Urban Area	Natural & Semi Natural Greenspace	44

Table 11: Other greenspaces not meeting the quality standard

Ironside Farrar Ltd 25 50428 / October 2019

### 4.4 Accessibility of Open Space

The open space audit has included the City of Lisburn and the towns and villages in the wider Council area. Figure 3 illustrate the accessibility of the parks throughout the study area. The map below illustrates the accessibility of the parks in Dundonald.

Extract from Figure 3 mapping: Dundonald

#### **Lisburn City**

The residential areas to the **north of Lisburn City**, including Ballymacash, Tonagh and Magheralave do not access to local park provision, apart from Duncan's Park. Parts of the north western residential areas are not within the 1.6km distance buffer of this park and do not have access to other parks. However, there are a range of play facilities set in amenity greenspaces including a number of LEAPs and a NEAP. Queen Elizabeth II Playing Fields provides a Flagship play area.

The **eastern parts of Lisburn City**, including Wallace Park and Harmony Hill, contain a wide variety of open space provision, ranging from historic City Parks, sports fields and large areas of amenity greenspace along the River Lagan. There are a range of play facilities, including NEAPs, LEAPs and a Flagship play area. There is potential to upgrade the Hill Street/River Lagan Green Space to provide local park provision.

The **southern parts of the City** are reasonably well provided for with regards to parks provision. The Old Warren residential area contains a range of parks, sports pitches, amenity open space and children's play areas. However, upgrading the Grove Activity Centre Green Space to a park facility will improve provision. The area is well served by play facilities, including well distributed LEAPs, a NEAP and the Queen Elizabeth II Playing Fields Flagship play area.

Ironside Farrar Ltd 26 50428 / October 2019

#### Lisburn Greater Urban Area

The Derriaghy, Kilmakee and Dunmurry areas of the Lisburn Metropolitan area have limited park space, with Bell's Lane Park being the only park. But the area has a good spread of amenity greenspace and play facilities throughout the area. There is potential to upgrade the River Road/Ballybog Road Green Space to provide local park provision.

### Castlereagh Greater Urban Area

**Newtownbreda** has an under provision of park space, with Colby Park being the only park. There are only 2 LEAPs and 1 NEAP in the area. There is potential to upgrade Breda Terrace Green Space to improve park provision. However, park and play provision should be identified in the southern part of the residential area, which contains very little open space. There are planned residential developments in the south east of the settlement, which include play provision, but a further review of the provision in the existing residential area should be undertaken.

**Dundonald** is well served with regards to parks and play space, with Moat Park and a Flagship play area. However, provision could be extended through the upgrading of Ballybeen Green Space and Dungoyne Park to provide local park provision. There is opportunity to provide a further LEAP in Millreagh Green and Dungoyne Park.

### **Towns & Villages**

Residents of the town of **Moira** benefit from the high quality provision of open space facilities and landscape qualities of Moira Demesne, along with a Flagship play area (combining a NEAP and a LEAP). There are a range of facilities for people of all ages and abilities, along with toilet facilities, ranger offices, car parking and interpretation. The town park is with easy reach of all the residential areas of the town. **Hillsborough** is well served with regard to open space provision, with a town and local park, a Flagship play area (LEAP) easily accessible from adjacent residential areas. There are a range of recreational opportunities at Hillsborough Forest Park and at Hillsborough Fort.

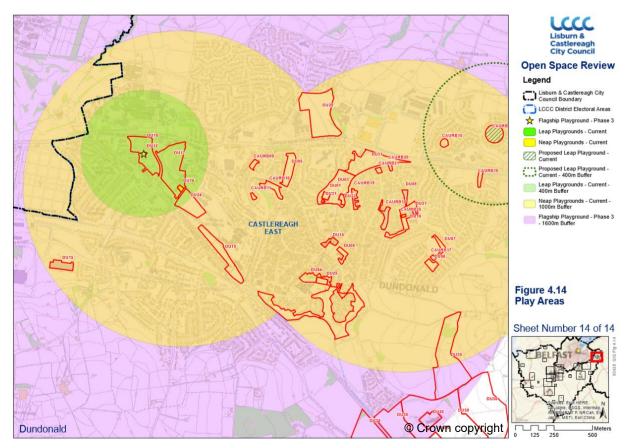

**Ravernet**, which had a low average quality score, contains a LEAP. There is opportunity to upgrade an existing open space to provide a local park. **Halftown** contains a LEAP which is accessible from all parts of this small village. There is opportunity to improve the quality of the surrounding greenspace to provide a better quality open space for the village. There is opportunity to upgrade **Milltown** Avenue open space to provide a local park.

There is opportunity to upgrade an existing open space in **Glenavy** to provide a local park. The village is well provided for in terms of children's play facilities, with all residential areas within 400m of an equipped play area. **Stoneyford** is well provided for with regard to open space and play facilities. **Maghaberry** is well provided for with regard to open space and play facilities, with access to 2 local parks, a NEAP and 2 LEAPs. **Aghalee** village has good access to children's play provision. **Lower Ballinderry** does not have a park or play area, however the size of the village may not warrant provision of these facilities.

**Annahilt** does not contain any parks but has a good quality LEAP, which is reasonable provision for a village of that size. **Dromara** contains good quality park provision and accessible play facilities for a range of ages. **Carryduff** and **Moneyreagh** have good overall park and play area provision, with all residential areas within easy distance from facilities.

Ironside Farrar Ltd 27 50428 / October 2019

The map below illustrates the accessibility of the play areas in Dundonald.

Extract from Figure 4 mapping: Dundonald

# 5.0 OPEN SPACE PRIORITIES

## 5.1 Opportunities for Open Space

The following table summarises the findings of the open Space Audit Assessment, setting out the recommended actions for specific open spaces to meet the current deficiencies in open space facilities, quality and provision:

Reference	Site Name	Settlement	Туре	Action
LI98	Magheralave Road	Lisburn City	Parks & Gardens	Improve quality to over 65%
CAURB26	Colby Park	Castlereagh Gr. Urb. Area	Parks & Gardens	Improve quality to over 65%
LSCOU02	Mckee's Dam	Lisburn Countryside	Parks & Gardens	Improve quality to over 65%
LSCS03	Bell's Lane Park	Lisburn Countryside	Parks & Gardens	Improve quality to over 65%
LI78	Nettlehill Road	Lisburn City	Play Area	Improve quality to over 65%
HT01	Coronation Gardens	Halftown	Play Area	Improve quality to over 65%
DRUM01	Dromara Road	Drumlough	Play Area	Improve quality to over 65%
LIURB21	Riverbank	Lisburn Gr. Urban Area	Play Area	Improve quality to over 65%
LV02	Laganview Terrace	Lurganville	Play Area	Improve quality to over 65%
GL06	Killultagh Avenue	Glenavy	Play Area	Improve quality to over 65%
LI75	Grove Activity Centre	Lisburn City	Play Area	Improve quality to over 65%
GL05	Johnston Park Play Area	Glenavy	Play Area	Improve quality to over 65%
ML01	Milltown Road GS	Milltown	Amenity Green Space	Improve quality to over 65%
RY01	Ryan Park GS 1	Ryan Park	Amenity Green Space	Improve quality to over 50%
LI63	Mourneview Park 2 Green Space	Lisburn City	Amenity Green Space	Improve quality to over 50%
LIURB03	Willow Gardens	Lisburn Gr Urban Area	Natural & Semi Natural Greenspace	Improve quality to over 50%
CAURB14	Millreagh Green	Dundonald	Amenity Green Space	Provide a LEAP in the Park
DU03	Dungoyne Park, Dundonald	Dundonald	Amenity Green Space	Provide a LEAP in the Park
GL04	Killultagh Green	Glenavy	Amenity Green Space	Upgrade to a local park
LU02	Campbell Terrace Playing Field	Lurganure	Amenity Green Space	Upgrade to a local park
RA01	Ravarnet Gardens Green Space	Ravernet	Amenity Green Space	Upgrade to a local park
CAURB03	Breda Terrace Green Space	Castlereagh Gr. Urban Area	Amenity Green Space	Upgrade to a local park
DU04	Ballybeen Green Space	Dundonald	Amenity Green Space	Upgrade to a local park
DU03	Dungoyne Park, Dundonald	Dundonald	Amenity Green Space	Upgrade to a town park
LI13	Grove Activity Centre Green Space	Lisburn City	Amenity Green Space	Upgrade to a local park
ML05	Milltown Avenue	Milltown	Amenity Green Space	Upgrade to a local park
LIURB06	River Road/Ballybog Road Green Space	Lisburn Greater Urban Area	Amenity Green Space	Upgrade to a local park
LI12	Hill Street/River Lagan Green Space	Lisburn City	Amenity Green Space	Upgrade to a local park

Table 12: Recommended Actions

More detailed information about the recommendations for each of the open spaces can be found in the Play Audit Summary database.

The following sites have been identified for further review to potentially upgrade them to local parks, thereby improving the provision of recreation and play provision in the local area:

Reference	Site Name	Settlement	
CA12 and CA19	Lough Moss Leisure Centre	Carryduff	
MON01	Hillmount Cottages Green Space	Moneyreagh	
LI33	Windermere Lodge Green Space	Lisburn City	
LI16	Rathvarna Drive Green Space	Lisburn City	
LI129	Nettlehill Road Pitch	Lisburn City	
LI26	Laurelhill Road Green Space	Lisburn City	
LI41	Drumard Drive Green Space	Lisburn City	

Table 13: Potential sites for further review

# **Appendix 1 – Open Space Quality Criteria**

### Access & Community

Fitness for Purpose Assessment Criteria	5 High	3	1 Low	not applicable <i>n/a</i>
Well located & close to community	integral with community infrastructure and local path and greenspace networks	direct, safe and legible connections to local communities	poorly sited with clear severance between greenspace and other community infrastructure	connections to community not relevant
Meets DDA requirements/ Disabled Needs	compliant in all respects with DDA includes specific elements supporting disabled use	DDA compliant in terms of grades and main routes step and barrier free	non DDA compliant with barriers to free access for disabled and other user groups	DDA compliant not appropriate or achievable on a site of this character/ location/type
Provides Quality Paths Fit-for-Purpose	appropriate path surface, well maintained with no management or drainage issues	appropriate path surface with some minor maintenance and/or drainage issues	poor quality or inappropriate path surface for location or levels of use; significant maintenance or drainage issues	no paths expected on a site of this type or size (e.g. waterbody, dense woodland or scrub, small scale amenity space)
Connects to other transport nodes	good connectivity with fixed transport links, quality bus routes, cycle and path networks	connects to other path and cycleway networks provided by footways and footpaths	poorly connected with no obvious path networks or transport modes	connectivity not available or appropriate on a site of this character/location/type
Allows movement in & between places	provides for highly permeable boundaries and multiple points of entry/access as part of a path or greenspace network	provides routes and connections connecting places	poorly connected with paths and natural desire lines unprovided for or restricted	movement between places not relevant to the site
Has accessible entrances in right places	entry points well placed and accessible to encourage safe access and use	entrances satisfactory	entrances poor by reason of siting; safe accessibility and connection to communities	entrance locations determined by other factors and non- relevant to the site
Offers connected path network and signage	high quality, legible way marking and signage indicates links to wider path and cycleway network	some good connections but signage incomplete and/or no way marking	limited connections and no signage or way marking to indicate wider connectivity	signage inappropriate to the location/site

Ironside Farrar Ltd 31 50428 / October 2019

# Attractiveness / Place Appeal

Fitness for Purpose Assessment Criteria	5 High score	3	1 Low score	not applicable <i>n/a</i>
Attractive and offers a positive image	overall quality image, feel and appeal created through character and quality of the elements	attractive with many positive elements but includes issues that need addressing	poor image and low level of appeal/ attractiveness likely to generate a negative image	attractiveness not an issue by reason of site/character or use
Provides an attractive setting	contributes significantly to the quality, character and setting of the urban area/ settlement/place	contributes to quality but the profile and level of visibility limit the capacity to significantly impact on place quality	does little to support place quality by reason of location or quality and image of the site	not relevant
Quality materials/equipment/ furniture	provides quality suite of external/public realm furniture and equipment with good materials	mixed quality with some elements in need of renewal or upgrading to remain fit for purpose	poor quality finishes, materials and equipment that limit appeal and use	not relevant
Attractive planting/landscape elements	offers attractive plant assemblages (native or exotic) that support place character and quality	offers a variable quality of plants and landscape elements that supports quality but could be better	generally poor quality or inappropriate planting and landscape management	plant and landscape elements not relevant to function and/or type of space
Welcoming boundaries/entrances	user friendly boundaries and entries offer clear sense of welcome and signal community value and use	functional boundaries and entrances define site with neutral impact on character or functionality	poor quality boundaries impact negatively on perceptions of place entrances and boundary treatments	not relevant to site and/or location
Facilities in clean/safe/usable condition	spaces and facilities clean, tidy and clearly valued, well used and well maintained	spaces in usable condition but issues evident with cleanliness, and condition	facilities either in poor condition or issues with cleanliness and condition likely to restrict use	condition of facilities not relevant to the site
Low levels of litter & adequate bins	no evidence of litter and litter bins (where provided) in good condition and maintained	low levels of litter with bins evident and litter generally localized and/or short term	litter clearly an issue with established litter problem and bins absent or not adequately maintained	litter not relevant
Well maintained	clear indications of appropriate levels of maintenance well targeted to the site that supports quality of place	level of maintenance generally good but challenged by use/ mis-use	levels of maintenance failing to support quality of place and address use/ mis-use	maintenance not relevant to the site by reason of scale and/ or other management activity

Ironside Farrar Ltd 32 50428 / October 2019

# Biodiversity

Fitness for Purpose Assessment Criteria	5 High score	3	1 Low score	not applicable n/a
Contribute positively to biodiversity/ water/ air quality	biodiversity issues are clearly evidenced within the site and contribute to site quality	biodiversity contributes through semi-natural elements but no other evidence of active management	opportunity to support biodiversity not taken and site offers little positive value	biodiversity not relevant by nature of the space and function
Large enough to sustain wildlife populations	site strongly supports native populations by green networks and quality of landscape elements	site supports some native populations but fragmented and value limited to site	site fragmented and unconnected to wider networks with little habitat value	habitat opportunity and value not relevant
Offer diversity of habitats	offers a diversity of habitats that offer good connections with extended edges and linkages	offers a range of habitat types but connections and the range of habitat types could be stronger	poor quality and attention to habitat development	habitat diversity not relevant
Part of wider landscape structure	a key part of a wider network and landscape character area	contributes to wider networks and landscape character areas	poorly connected and very limited contribution to the wider landscape setting	landscape setting not relevant
Connects to wider green Networks	offers strong connections and plays an important role within the wider Green Network	offers limited connections and contribution to the Green Network	poorly connected and represents a fragmented and discrete site with very limited role within the Green Network	not relevant
Balance habitat protection & access	clear balance evident; where appropriate, supported by information and good path routing	access and habitat protection clearly working and no evidence of problems	quality habitats suffering from other uses and need for management attention	not a relevant issue on the site
Resource efficient (grass cutting/peat compost)	clear attention to resource and sustainability issue evidenced on site (SUDS/recycling/ encouragement to reduce litter)	site and facilities fit for purpose demonstrating some evidence of attention to resource efficiency	evidence of inappropriate resource activity that offers very limited benefits to user or quality of place	resource efficiency not a relevant issue

Ironside Farrar Ltd 33 50428 / October 2019

# Functionality

Fitness for Purpose Assessment Criteria	5 High score	3	1 Low score	not applicable n/a
Offers a range functions / flexibility of use	good diverse range of activity reflecting user needs, setting location and character of the site	range of activity reflecting user needs, setting, location and character of the site	poor, very limited range of activity that does not reflect anticipated user needs and site context	not relevant
Diverse play / sport/ recreational opportunity	a range of challenging play and sport activity provided for a breadth of age and user groups	play and sports facilities provided but limited range	play and sports facilities not provided in locations were such facilities would be appropriate	play and sports facilities not relevant to this type of space and/or location
Offers good places for Social Interaction	offers good spaces and places for social activity that are used by communities and include supporting furniture	offers spaces for social activity	offers none or very limited areas considered safe and usable for social activity	not relevant
High quality facilities meeting user needs	provides a well used site that clearly reflects needs, providing high quality facilities	provides for a range of activities that address need and offers good quality facilities	provides a range of activities that appears unconnected to local need and is of indifferent quality	appropriateness of facilities and need is not relevant
Appropriate facilities for location/ size/use	facilities are appropriate to function and include service elements such as toilets, lit paths, range of play etc	facilities are restricted given the scale and function of the site	facilities are poor or non-existent for this scale and function of site	appropriateness of facilities is not relevant
Facilities well sited for all ages	facilities are well sited offering natural surveillance, readily accessible and suited to all ages	facilities are well sited and accessible but locations may not address all user needs	facilities are poorly sited, restricting access, compromising safe use or access and offer barriers to activity	not relevant
Adaptable to changing needs / use	greenspace offers good flexibility and adaptability for use, capable of accommodating changing needs	greenspace is flexible but any significant change of use would require major change	greenspace is very inflexible unlikely to be able to address changing needs	adaptability of use is not relevant

Ironside Farrar Ltd 34 50428 / October 2019

# Community Benefits

Fitness for Purpose Assessment Criteria	5 High score	3	1 Low score	not applicable <i>n/a</i>
Safe and welcoming	site offers safe welcoming image through a range of positive measures such as signage, lighting and sightlines	site is welcoming but issues of safety have potential to impact on more vulnerable user groups	site is clearly neither safe nor welcoming to a majority of users	issue of safety and sense of welcome not relevant
Good levels of natural surveillance	site offers good natural surveillance from surrounding areas and complies with Safe by Design principles	site generally overlooked with main areas offering good natural surveillance	site offers very limited natural surveillance and issues of perceived safety therefore arise	natural surveillance not applicable to this site
Low levels/Absence of anti-social behaviour	site offers no evidence of anti-social behaviour and no evidence of activity likely to establish perceived threats to users	site generally has safe quality but with some limited evidence of anti-social behaviour or mis-use	site shows evidence of persistent antisocial behaviour	anti-social behaviour not relevant to this site
Appropriate lighting levels	appropriate lighting throughout the site with no obvious management or user issues	appropriate lighting at entrances and where appropriate main routes with only minor lighting issues	lighting poor, restricting use	lighting not relevant to this site
Sense of local identity & place	positively contributes to local identity and clear sense of place established by the character or quality of the site	contributes to sense of place and local identity	negatively contributes to sense of place and local identity	local identity and sense of place not relevant
Provide routes to wider community facilities	provides connecting routes to schools, library, community facilities and transport nodes	provides limited connections to community infrastructure	provides very restricted connections to community infrastructure	issues of community connectivity not relevant to this site
Contains distinctive/memorable places	creates a distinctive and memorable quality of place that supports local culture identity	contributes in some areas or parts to distinctiveness	offers no qualities that could be regarded as distinctive or memorable	not relevant
Community involvement in management	evidence or knowledge of active and direct community participation in site planning and site management	community participation through consultation on site planning and management	community consultation not part of the planning and management arrangements	issues of community engagement not relevant

Ironside Farrar Ltd 35 50428 / October 2019
