

CODE OF GOVERNANCE

Introduction

From a local authority perspective, governance is about how Lisburn & Castlereagh City Council ensures we organise and monitor our policies, processes, and procedures so that we report on what we do and how well we do it in a timely, inclusive, open, honest and accountable manner. For this Council, governance consists of the systems and processes, and the cultures and values, by which we are directed and controlled and through which we account to, engage with and, in some circumstances, lead our communities.

The importance of developing long range planning in tandem with governance structures and public financial management has become much clearer as the council has evolved in the post RPA environment. The links between the attainment of sustainable economic, societal and environmental outcomes and good governance processes and structures are becoming clearer and should be tested.

Lisburn and Castlereagh City Council continue to be committed to the principles of good governance and have developed this Code of Governance to demonstrate that our governance structures are open, transparent, robust and consistent with the core and supporting principles contained in the Local Government Framework:-

<https://www.cipfa.org/policy-and-guidance/publications/d/delivering-good-governance-in-local-government-framework-2016-edition>.

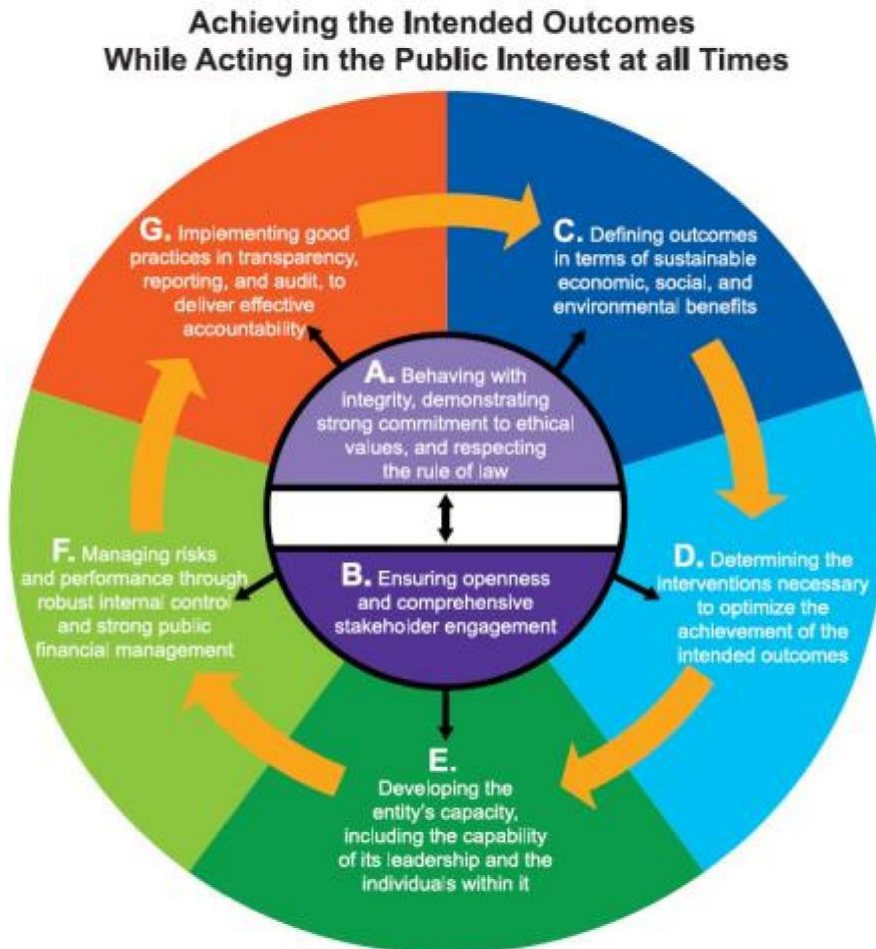

Principles of Good Governance

A good definition of governance is given in the CIPFA/IFAC publication, "International Framework: Good Governance in the Public Sector":-

"Governance comprises the arrangements put in place to ensure that the intended outcomes for stakeholders are defined and achieved. To deliver good governance in the public sector, both governing bodies and individuals working for public sector entities must try to achieve their entity's objectives while acting in the public interest at all times.

Acting in the public interest implies primary consideration of the benefits of society, which should result in positive outcomes for service users and other stakeholders.”

The core and sub principles from the International Framework are illustrated in the diagram below:

Compliance with the Code

This Code of Governance is supported by policies, procedures, and systems that have been set up to determine, monitor and control how the Council manages its affairs.

In order to demonstrate how the Council currently complies with this Code of Governance, the Council has utilised its values vision and investment priorities, and the associated behaviours and actions that demonstrate good governance in practice, as identified within the Delivering Good Governance in Local Government: Framework (April 2016) and the Council's Corporate Plan. The Code of Governance Schedule (see page 3 onward) provides details of Council's own systems, processes, and documentation to demonstrate compliance.

Compliance with this Code of Governance will be reviewed on an annual basis and the review will form the basis of the council's Annual Governance State.

<p>In addition to the overarching requirements for acting in the public interest in principles A and B, achieving good governance in the local government also requires effective arrangements for:</p>		
<p>C. Defining outcomes in terms of sustainable economic, social, and environmental benefits</p> <p>The long-term nature and impact of many of local government's responsibilities mean that it should define and plan outcomes and that these should be sustainable. Decisions should further the authority's purpose, contribute to intended benefits and outcomes, and remain within the limits of authority and resources. Input from all groups of stakeholders, including citizens, service users, and institutional stakeholders, is vital to the success of this process and in balancing competing demands when determining priorities.</p>	<p>1) Defining outcomes</p> <p>Having a clear vision, which is an agreed formal statement of the organisation's purpose and intended outcomes containing appropriate performance indicators, which provide the basis for the organisation's overall strategy, planning, and other decisions Specifying the intended impact on, or changes for, stakeholders including citizens and service users. It could be immediately or over the course of a year or longer Delivering defined outcomes on a sustainable basis within the resources that will be available</p> <p>Identifying and managing risks to the achievement of outcomes</p> <p>Managing service users' expectations effectively with regard to determining priorities and making the best use of the resources available</p> <p>(2) Sustainable economic, social and environmental benefits</p> <p>Considering and balancing the combined economic, social and environmental impact of policies and plans when taking decisions about service provision Taking a longer-term view with regard to decision making, taking account of risk and acting transparently where there are potential conflicts between the organisation's intended outcomes and short-term factors such as the political cycle or financial constraints Determining the wider public interest associated with balancing conflicting interests between achieving the various economic, social and environmental benefits, through consultation where possible, in order to ensure appropriate trade-offs Ensuring fair access to services.</p>	<p>Performance Improvement Plan</p> <p>Community Plan Framework Community Planning-Overview</p> <p>Corporate Plan (2018 – 2022 & beyond): Plan</p> <p>Corporate, Directorate & Service Unit Risk Registers</p> <p>Annual Performance Improvement Plan</p> <p>Directorate Business Plans</p> <p>Quarterly Reviews of Business Plans</p> <p>Community Support Plan</p> <p>Current-Development-Plans</p>
<p>D. Determining the interventions necessary to optimize the achievement of the intended outcomes</p> <p>Local government achieves its intended outcomes by providing a mixture of legal, regulatory, and practical interventions (courses of action). Determining the right mix of these courses of action is a critically important strategic choice that local government</p>	<p>(1) Determining interventions</p> <p>Ensuring decision makers receive objective and rigorous analysis of a variety of options indicating how intended outcomes would be achieved and associated risks. Therefore, ensuring best value is achieved however services are provided.</p> <p>Considering feedback from citizens and service users when making decisions about service improvements or where services are no longer required in order to prioritise competing demands within limited resources available including people, skills, land and assets and bearing in mind future impacts.</p> <p>(2) Planning interventions</p> <p>Establishing and implementing robust planning and control cycles that cover strategic and operational plans, priorities and targets</p>	<p>Corporate Plan (2018-2022 & beyond)</p> <p>Annual Performance Improvement Plan</p> <p>Enforcement and Regulation Policy</p> <p>Performance Management Framework</p> <p>Review of Business Plans</p> <p>Economic Appraisals</p>

<p>has to make to ensure intended outcomes are achieved. They need robust decision-making mechanisms to ensure that their defined outcomes can be achieved in a way that provides the best trade-off between the various types of resource inputs while still enabling effective and efficient operations. Decisions made need to be reviewed frequently to ensure that achievement of outcomes is optimised.</p>	<p>Engaging with internal and external stakeholders in determining how services and other courses of action should be planned and delivered</p> <p>Considering and monitoring risks facing each partner when working collaboratively, including shared risks</p> <p>Ensuring arrangements are flexible and agile so that the mechanisms for delivering goods and services can be adapted to changing circumstances</p> <p>Establishing appropriate key performance indicators (KPIs) as part of the planning process in order to identify how the performance of services and projects is to be measured</p> <p>Ensuring capacity exists to generate the information required to review service quality regularly</p> <p>Preparing budgets in accordance with objectives, strategies and the medium term financial plan</p> <p>Informing medium and long term resource planning by drawing up realistic estimates of revenue and capital expenditure aimed at developing a sustainable funding strategy.</p>	<p>Business Cases</p> <p>Grant Aid Provision (Community, Business, Leisure, Arts and Heritage)</p> <p>Economic Development business programmes and support</p> <p>Risk-Management-Strategy</p> <p>Corporate, Directorate & Service Unit Risk Registers</p> <p>Estimates Process</p> <p>Financial Regulations</p> <p>Committee Terms of Reference</p> <p>Quarterly Review of KPIs</p> <p>Annual Performance Improvement Plan</p> <p>Capital Investment Programme</p> <p>Monthly Financial & Budget Reports</p> <p>Year End Financial Statements Accounts</p> <p>Medium Term Financial Plan</p> <p>Treasury Management Prudential Indicators</p> <p>Minimum Revenue Provision Policy</p>

<p>E. Developing the entity's capacity, including the capability of its leadership and the individuals within it</p> <p>Local government needs appropriate structures and leadership, as well as people with the right skills, appropriate qualifications and mind-set, to operate efficiently and effectively and achieve intended outcomes within the specified periods. <p>internal control and strong public financial management</p> <p>Local authorities need to ensure that the entities and governance structures that they oversee have implemented—and can sustain—an effective performance management system that facilitates effective and efficient delivery of planned services. Risk management and internal control are important and integral parts of a performance management system and crucial to the achievement of outcomes. They consist of an ongoing process designed to identify and address significant risks involved in achieving outcomes. A strong system of financial management is essential for the implementation of policies and the achievement of intended outcomes, as it will enforce financial discipline, strategic allocation of resources, efficient service delivery and accountability. It is also essential that a culture and structure for scrutiny are in place as a key part of accountable decision making, policy making and review. A positive working culture that accepts, promotes and encourages constructive challenge is critical to successful scrutiny and successful service delivery.
